

Solutions That *Perform*

..... from Dow Automotive

Dow Automotive provides manufacturers of passenger cars, light trucks and commercial vehicles with solutions that perform for automotive interior, exterior, and under-the-bonnet applications. Our material science and characterisation expertise, combined with design, engineering, processing knowledge and programme management, enable us to provide OEM, tier supplier and aftermarket customers with solutions that meet or exceed vehicle performance targets at lower weight and cost.

Vehicle production depends upon speed and flexibility. Dow Automotive aims to be a pace setter in the supplier industry by continuously upgrading our innovative products, world-class advanced engineering capabilities, application development processes, quality assurance. We are dedication to meeting your needs.

From design through product launch Dow Automotive can work with you at any level you desire.
