

Sandvik Mining and Construction

Sandvik's Mining and Construction business area includes several well-known trademarks as there are: Tamrock, BPI, Rammer, Sandvik Rock Processing, Toro, Brøyt and Driltech Mission.

Combined, they offer the market's most advanced and complete portfolio of products for drilling, excavating, loading and transporting of rock and minerals. Everything the world's mining and civil engineering industries need to increase their capacity and productivity.

Apart from Sandvik's Top hammer products, rotary drilling tools, demolition and cutting tools there are several specialist companies. TAMROCK specialises primarily in drilling units, drifting and tunnelling jumbos and drill tools for surface and underground excavation. BPI delivers Down-The-Hole and Rotary blasthole drills. DRILTECH MISSION focuses on speciality areas such as rotary and down-the-hole drilling. SANDVIK ROCK PROCESSING produces equipment for the mining and construction industry like crushers, screens and feeders, as well as mobile crushers and screening stations. BRØYT delivers hydraulic excavators for surface and underground applications. Hydraulic rock breakers, cutter crushers, pulverisers and booms are the main products of RAMMER. TORO is specialised in loader and dumper.

The common denominator for all products manufactured and marketed by Mining and Construction is that they enable customers to achieve further improvements in productivity. Time and time again.
