

SCHOTT

SCHOTT AG OPTICS FOR DEVICES

"In the beginning there was optics"

Optical glasses were the first products from SCHOTT. Our founder, Otto Schott developed them with entirely new properties. A prelude to more than 100 years of successful research and development that led to newer and newer innovations in glass.

SOLUTIONS FROM A SINGLE SOURCE

The business segment Optics for Devices has the most modern fabrication processes based on its wide technology base. Our special strength is that we have mastered all fabricating techniques up to highly accurate finishing. According to customers' wishes, this includes the processing of special glasses in clean rooms, polishing, CNC fabrication, bonding, joining, laser cutting, surface coating, and glass forming, as well as many other high tech processes.
