## Nokia Internet Communications

Nokia Internet Communications, headquartered in Mountain View, California, provides world-class Network Security, Virtual Private Network, Message Protection, Intrusion Protection and Internet Traffic Management solutions that ensure the security and reliability of corporate enterprise and managed service provider networks. Nokia is committed to enhancing the end user experience by bringing a new level of security and reliability to the network, enabling an Internet transaction that is personal and trusted—each and every time.

Nokia Internet security and virtual private network appliances span the spectrum of price/performance points, and secure the widest range of network environments—from the smallest branch office to the largest Internet data center. The expansive product line, backed by world-class global support and services, provides customers the ability to deploy multiple solutions from a single product to secure all elements of a distributed enterprise.
