

## HANSGROHE - ALWAYS FEELING GREAT

More and more people are looking to convert their bathroom into a truly comfortable feel-good room. Hansgrohe offers an extensive programme which puts these wishes within everyone's reach. Starting with showers, because Hansgrohe showers will put an end to the hitherto boring old shower routine. The interchange between gentle shower and pulsating spray, wide-spread rain shower and intense water power will cater for the most discriminating user.

But it is not the showers alone that make you feel good, our mixer lines for bathroom and kitchen as well as our waste systems are similarly relevant. Our system concept makes orientation quite easy: All components of the individual product lines coordinate perfectly as to their looks and technical performance, to ensure that everything fits together. And to make that feel-good factor last, every Hansgrohe product excels in durability, material and function. With Hansgrohe you can depend on the highest quality and always expect the latest technological solutions for bathroom and kitchen. Why not experience the meaning of "Well-being through Function" for yourself.
