Professional hand hygiene

Metsä Tissue is the market leader in tissue products in the Nordic countries and a major supplier of high-quality tissue products to the markets across Europe.

For commercial, industrial and institutional customers, Metsä Tissue's Away-from-Home division provides a comprehensive range of paper tissue products and dispensers sold mainly under the Katrin® brand name. These consist of bathroom tissue, paper towels, industrial wipes, dispensing systems and a variety of specialised tissue products. Metsä Tissue's ranges include products for food processing and preparation, healthcare, hotels and restaurants, schools, offices and manufacturing.

Central to the Katrin brand is the "Less is More" concept. Katrin products are designed to the optimum performance specification and to avoid the perennial problems created by using sub-standard or over specified products. They are functional, contribute to reduced consumption, generate less waste, and have positive effects for economy, environment, and hygiene at every stage of their life cycle.
