COMOS – Making data work.

Plant Engineering Software – from Integrated Engineering to Integrated Operations

Advantages of standardized workflows with COMOS

- End-to-end coverage of the complete plant lifecycle with COMOS
- Opens up new possibilities for successful enterprise management and engineering
- Interdisciplinary functioning across all company levels and locations
- Easy to use, even with large data volumes
- Easily integrated in existing IT landscapes
- Standard data management throughout and up-to-date plant documentation at all times
- Interoperability through open system architecture
- Shorter time-to-market

COMOS offers plant management with new perspectives

Global competition, shorter innovation cycles, increasingly stringent legal regulations for safety and environment protection, as well as a rising demand for individualized products pose enormous challenges for plant engineers and operators. This calls for innovative solutions like COMOS, which can economically optimize productivity, quality, and flexibility – throughout the entire plant lifecycle. Efficiency through a common, up-to-date database

With COMOS, Siemens is the only company in the world to offer the process industry a software solution for the integrated management of plant projects – from engineering and operations to modernization as well as dismantling. COMOS ensures that engineers and operators can access all project-relevant data at all times, across all company levels and in all project phases. COMOS offers a seamless flow of information by providing a common database. Because all data is always available and up-to-date, it depicts the actual as-built status of a plant at all times. In this way, COMOS lays the foundation for greater reliability in decision-making and more efficient processes

throughout the entire plant – for a lasting improvement in competitiveness. Innovation in the service of industry COMOS is the result of our comprehensive technological expertise and many years of experience in a wide range of different industrial sectors. Given the highly dynamic markets in which our customers need to succeed, we are continuously developing our innovative solutions in line with the growing challenges facing the process industry.

Optimization over the entire plant lifecycle

In all phases from design through installation, start-up, and operation to maintenance and modernization, our comprehensive and innovative solution portfolio lets you make full use of the optimization potential in every phase of your plant's lifecycle. This allows you to optimize your market position and competitiveness on an ongoing basis.
